PROFESSIONAL SUMMARY

Ambitious Full Stack Developer pursuing a BIT (Hons) in Network and Mobile Computing. Experienced in building responsive, scalable web applications using modern frameworks like Next.js, React, and Spring Boot. Strong problem-solver capable of adapting to various challenges in fast-paced development environments.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, PHP

Frontend Technologies: React, Next.js, React Native, HTML, CSS, and Tailwind CSS.

Backend: Node.js, Express.js, Spring Boot, Java, Python

Databases & ORM : MongoDB , Prisma ORM , MySQL , Firebase

Tools : Git/GitHub , Docker , Postman , Figma

WORK EXPERIENCE

Software Engineering Intern | Sri Lanka Telecom (April 2025 – October 2025)

- created a full-stack tire management system utilizing MongoDB REST APIs, Spring Boot (Java 17), and React 18 (Material UI).
- Secure authentication was implemented using a custom MongoDB fallback and Azure AD Single Sign-On (SSO).
- managed the Render backend while deploying the frontend on Vercel and creating role-based dashboards with dynamic filtering.

PROJECT EXPERIENCE

WORKCONNECT LK | Full-Stack Job Portal

(<https://workconnect.senalridmila.me>)

- created a MERN stack job marketplace with safe OAuth authentication and real-time conversation over Socket.io.
- The application was deployed to an AWS EC2 instance for scalable production hosting after being containerized using Docker.

AYURVEDA WELLNESS APP | Final Year Project

(<https://github.com/SenalRidmila/ayurveda-wellness>)

- created a cross-platform React Native application that integrated Firebase for booking and the Google Gemini API for AI symptom diagnosis.
- developed a Next.js admin panel with i18next multilingual support and automated EmailJS notifications.

CAR RENTAL MANAGEMENT SYSTEM | 2nd Year Project

(<https://github.com/SenalRidmila/Car-Rental-Management-System>)

- created an MVC-based Java Swing desktop application for effective fleet and rental management.
- JDBC PreparedStatements were used to implement secure MySQL database connectivity and real-time data binding.

MAMARI LK | Web Application

(<https://www.mamari.lk>)

- Next.js was used to engineer a responsive web application, while Vercel was used to expedite CI/CD deployment.
- Google Search Console was connected for site analytics, professional webmail services were set up, and custom domain routing was configured.

EDUCATION

BIT (Hons) in Network and Mobile Computing | HORIZON CAMPUS | 2021

Debarawewa Central College | GCE Advance Level | 2020

CERTIFICATIONS

Create a Supermarket app using Java OOP | Coursera | 2024

Data Structures & Backend with Java| Coursera | 2024

python Programming | UST | 2024
